FILMING TECHNIQUES

Camera · Lighting · Editing — Make it look cinematic on any phone

📷 CAMERA

✅ **DO THIS:**

- Raise phone above piano, tilt DOWN 15°
- Slight side-angle (avoid flat/head-on)
- Use tripod or propped-up position
- Extreme close-up for key press moment
- Slow movement — no shaky handheld

❌ **AVOID:**

- Don't film perfectly horizontal/flat
- No shaky movement for piano shots
- Don't zoom digitally — move camera instead

💡 LIGHTING

✅ **DO THIS:**

- Soft ambient room light — warm tone preferred
- Light source ABOVE and BEHIND camera
- Match brightness of both pianos when filming split
- Use natural window light if available
- Slight dimness adds cinematic mood

❌ **AVOID:**

- No flash — kills emotion
- No bright desk lamp behind camera
- No reflections on glossy piano keys
- Never have face reflected in keys

🎬 EDITING

✅ **DO THIS:**

- Clips max 10–15 seconds each
- Smooth cuts — no jarring transitions
- Soft piano music throughout
- White minimal text only — clean font
- Let scenes BREATHE — don't rush

❌ **AVOID:**

- No flashy transitions (wipes, spins)
- No busy lower-thirds or graphics
- No over-explaining in captions
- Never drown visuals with loud music
